Date: June 10 2019
From: Sue Kutay, WW Product Manager, Flexographic Packaging Solutions
To: Customers & Dealers of KODAK APPROVAL Digital Color Imaging System products
Subject: **End of Sale for Kodak Proofing Software for Approval**

To our valued customers and dealers:

Thank you for being a long-standing customer and choosing our KODAK APPROVAL Digital Color Imaging System products. We are committed to the continued and productive use of your Kodak Approval system.

The Kodak Approval System has enjoyed 30 years of producing unmatched proofing quality, and we trust it has contributed to your business success. However, the gradual migration of customers to alternative proofing technology has resulted in a year-over-year decline in the number of customers updating their s/w technology. Because of this trend, Miraclon is discontinuing the sale of new installations of KODAK Proofing Software (KPS) to Approval Customers as well as the associated workstations as part of our sales portfolio. The table below lists the products that are affected by this decision.

Discontinued sales options – effective 8 April 2019.

Sales Option	Product Name
015-01041C-01	KODAK Proofing Software for KODAK APPROVAL System - Base
KH2318600	Remanufactured KODAK APPROVAL Workstation Upgrade
KY1487537	KODAK APPROVAL Workstation Upgrade
017-01012B	Remanufactured KODAK APPROVAL Workstation Upgrade with KODAK Proofing Software
015-01041C-21	KODAK APPROVAL Isolated Workstation System

Orders placed after 8 April 2019 will not be fulfilled.

Existing KPS for Approval customers can upgrade to the latest release. In addition, workstation break fix support and service contract support is still available.

If you have any questions regarding this communication, please contact your local sales manager.

We appreciate your continued loyalty and support, and look forward to your ongoing business success using our solutions and products.
