

September 18 2020

From: Sue Kutay, Global Product Manager, Flexographic Packaging Solutions
To: Customers and Channel Partners of KODAK FLEXCEL SRCK Products
Subject: **Updated Catalog number KODAK FLEXCEL SRCK 7.0 MM Plates**

To our valued customers and channel partners:

Thank you for being a long-standing customer and choosing to use KODAK FLEXCEL NX products.

Effective October 1, we have moved to simplify our FLEXCEL SRCK Plate portfolio and will inactivate duplicate catalog numbers that were accidentally set up for the same product.

The table below provides the go forward catalog number you can now use to order the same product.

If you ordered this catalog number...		You now order this catalog number as of 01 October 2020	
Catalog number		Catalog number	Material Description
9382151		20376756	FLSRCK 70 1067 2032 M SE000 0003 P1 M

What action do I need to take?

Please update your next purchase order to use the replacement product catalog number.

The discontinued catalog number will become unavailable automatically effective October 1 and the replacement item will be shipped in its place once our existing inventory of the previous catalog number is used up.

Please forward any questions you may have regarding this product notification to your local sales manager or channel partner or our local customer care desk.
