Packaging – What is changing?

There are three (3) changes you will see:

1. A paperboard divider replaces the existing polystyrene (PS) sheet.
2. Some products will shift to 6 plates per box (see Table 2).
3. The weight of a single box of plates will increase (see Tables 1 and 2).

These changes provide the same level of protection to the plates during shipment, while significantly increasing the recyclability of our packaging and removing polystyrene (PS) plastic from the product waste stream.

What actions do I need to take?

Update part numbers and weights in your ordering systems for:

Plate Kits: If you are currently ordering plate kits, continue to order as you are now. Miraclon Customer Care will inform you that you will be receiving the updated

packaging once existing stock is depleted. At that point, update your systems to the part numbers and weights in Table 3.

Standalone Plate Orders: If you are currently ordering standalone boxes of plates you will need to update your systems and start ordering using the updated product numbers listed in Tables 1 and 2.

Please share this information with others in your business, as appropriate.

If you have any questions regarding this communication, please contact your local sales manager or technical support. We are here to help.

Thank you for choosing FLEXCEL NX Solutions.
