

February 2024

To: Miraclon Consumables Customers & Channel Partners

New Labeling for Miraclon's Consumables Portfolio

We're excited to introduce revamped packaging labels for our entire consumables portfolio. These labels are designed for easy readability, ensuring that product and handling information remains visible when stacking boxes on a pallet. The product inside the package is unchanged.

Figure 1 New product labelling.

Key points:

- Recycling code information for the packaging is now available in a quick reference table.
- A new QR code on our packaging directs customers to up-to-date product information on our corporate website.

Starting in February 2024, customers will receive some products with new packaging labels.

For any questions, contact ask@miraclon.com. Thank you for your continued support!

If you need further assistance, feel free to reach out to your local Miraclon contact.

Scan the QR code to access the latest storage, handling, shipping recycling information.
